Hello, I'm Gianmaria Villa, the founder of Velox Servizi and I wanted to add this introduction to our presentation to highlight the important aspects that make us stand out from our competitors.

Velox Servizi was set up in 1990 and has always operated with business integrity, with special focus on our collaborators, who are the backbone of the company.

An artisan way of working and mindset applied on an industrial scale have ensured that Velox Servizi developed in a gradual, consolidated manner, winning a select number of customers annually and providing that personal touch that underpins relationships based on loyalty.

Working according to strict business principles provides a guarantee first and foremost for our customers.

Our strengths include the following:

Business continuity since 1990
Only working with personnel recruited directly
Work is never subcontracted
We have long-established customers
We have loyal employees
No company or union conflict

Regards

Jare Ville.

INDUSTRIAL, COMMERCIAL AND HEALTHCARE PREMISES

A clean, tidy environment makes a lasting first impression.

Velox can provide professional deep cleaning and maintenance services specially designed for offices, shops and commercial centres. These maintain high standards of hygiene and respect the confidentiality of each employee's work area.

Food businesses requiring specific solutions, suitable for production lines and food safety requirements, can benefit from the expertise of a trusted partner when working with Velox.

We offer a range of efficient and endorsed cleaning and maintenance services.

- Cleaning services for offices, shops and business premises
- W Cleaning services for educational establishments, religious premises, nursing and care facilities, banks and government offices.
- www Windows of any size and height cleaned.
- W Industrial flooring cleaned using mechanical equipment.
- W Production lines cleaned and maintained regularly.
- **W** Special cleaning for machine tools.
- W Cleaning in medical rooms, changing rooms and toilet facilities on production sites.
- W Cleaning in canteens, refectories and kitchens.
- W Dust extraction from walls, ceilings and, pipes.
- W Cobweb removal from ceilings and walls in industrial premises.
- W Collection, handling and compacting service for site waste.
- W Anti-stain and anti-dust treatment for industrial flooring, including in food environments.
- Epoxy treatment for walls subject to frequent washing.
- W Treatment to protect and/or restore worn flooring.
- Resins of specified thickness and self-levelling treatment.

PROFESSIONAL TREATMENTS

Washing surfaces and windows of any size and structure.

The use of aerial platforms of various heights and shapes makes it possible to reach considerable heights and difficult corners, adequately clean surfaces and windows, and remove deposits and scaling caused by atmospheric agents and pollution. Velox always uses cutting-edge equipment such as reverse osmosis machinery, restricting the use of aggressive chemical products that pollute the environment.

Anti-dust treatments for industrial flooring.

Essential in the food, pharmaceutical and electronics industries and extremely useful in all other production sectors, anti-dust treatment for industrial quartz cement flooring prevents the absorption of stains and natural floor dust, improving its appearance and facilitating washing and maintenance.

Velox has a range of products specially designed and manufactured to meet varying requirements, from simple dust removal through to standard treatments for the food and pharmaceutical industries.

Crystallising and micro-buffing for marble floors.

Flooring can be restored with special machinery, removing the marks of time and restoring a newly-laid appearance.

Restoring and maintaining strong, hard flooring, carpet cleaning and de-infestation.

If flooring requires restoration and/or efficient maintenance we offer the following professional maintenance services: waxing, polishing, applying anti-stain solutions, washing and disinfecting surfaces, and washing carpets with injection and extraction systems.

SPECIAL TREATMENTS

Creation and maintenance of HACCP-compliant cleaning plans.

The implementation of EU directives on HACCP systems and the resulting self-auditing protocols focus on the need to guarantee food safety and hygiene, and consequently the suitability of production lines and environments in terms of hygiene. Therefore food and hygiene companies can benefit from having a reliable, expert partner to deal with environmental hygiene issues. We can create, set up and maintain specially designed cleaning plans for individual customers, complete with the necessary supporting documentation to be included in company self-audit plans, enabling full compliance with existing legislation. To complete the cleaning plan, test protocols can be cross-referenced with company-specific requirements.

Cleaning contamination-controlled environments

An increasing number of food, pharmaceutical, healthcare companies and other industries need to manage contamination-controlled environments and clean rooms of various types, in order to ensure maximum safety and precision in their production processes. Velox can provide ongoing cleaning services for such companies, in line with a detailed plan created on the basis of customer requirements.

Waste collection, handling and compacting services.

On modern industrial premises issues surrounding the environment and the creation of an effective waste sorting system have become increasingly important. After analysing production arrangements and types of waste produced, Velox can implement and maintain an integrated waste sorting system, providing an organised, ecological and cost-effective waste disposal system for companies.

Ozone sanitation service with Ozosì® systems

To optimise the quality of environments, Velox uses patented Ozosì® ozone systems which use the oxidising power of ozone to sanitise air and surfaces naturally, and in a safe, environmentally-friendly manner, eliminating bacteria, odours, viruses and numerous other contaminants. Velox has a wide range of OzoSi® systems to treat environments in all sectors and of any size..

Personnel for company canteens.

Velox can provide trained personnel to serve meals and clean company canteens.

Logistics and porter services.

Velox can provide operators equipped with electric pallet trucks and forklifts for short periods or on the basis of ongoing contracts, to quickly and efficiently move, load and unload goods and anything else required to support customers

A BENCHMARK IN THE CLEANING INDUSTRY

VELOX ACADEMY

High cleaning standards require ongoing training

Velox selects and trains personnel carefully, because achieving excellence and ensuring complete customer satisfaction means fully developing human resources. In line with specific customer requirements, Velox can provide competent, skilled professionals trained in specialist facilities who are experienced at providing customers with efficient, confidential services.

Velox places significant focus on all cleaning phases to ensure safe, effective results.

Thanks to highly specialist training, Velox personnel can evaluate the best treatments to be used, resolving small, large or established cleaning/maintenance issues and protecting surfaces appropriately.

The other secrets of Velox cleaning services

Environmentally-friendly detergents and consumables that are carefully selected to safeguard humankind and the environment.

The use of cutting-edge professional equipment to enable Velox specialists to optimise the effectiveness of products used, and complete operations as quickly as possible, keeping costs down considerably.

Certification: quaranteed results

The attention to customer needs and the quality of the services provided have allowed Velox to obtain in 1998 the ISO 9001 certification, recently updated in ISO 9001/2000, in the design and supply of cleaning services in the civil, commercial, industrial and food subject to HACCP regulations, in 2008 the ISO 14001: 2001 certification, in 2013 the BS OHSAS 18001 certification and Ecolabel certifications in 2020, with an equality rating certification ***

This means being able to guarantee professional results to the highest and constant quality standards in full compliance with the safety, legality and equity standards guaranteed by the dictates of a company code of ethics of Law 231/2001 on Corporate Responsibility that Velox has decided to guarantee and respect.

VELOX – PROFESSIONAL SOLUTIONS AT YOUR SERVICE

Customised solutions for all requirements.

Working with Velox means:

Having an expert partner that adds value to your business.

Optimising your time and finances, thanks to efficient, flexible solutions and measures that let you focus strategically on your core business.

Having access to qualified professionals to meet special cleaning requirements.

Our proposal.

After an inspection by one of our experts a free, no-obligation quote is drawn up for customers and includes a work plan, description of actions, frequency, consumables to be used, and supplies, if applicable.
